

Doctoral regulations of Faculty III – Process Sciences

Please note that this is a non-binding translation of the Doctoral Regulations

of 23 September 2020

The Faculty Board of Faculty III – Process Sciences adopted the following doctoral regulations in accordance with Section 18 (1) sentence 1 no.1 of the constitution of Technische Universität Berlin in the version published 20 September 2018 (TU Official Gazette (AMBI) no. 19/2018, p. 182:*)

Section 13	Honorary Doctorates
Section 14	Revocation of a Doctorate
Section 15	Transitional Arrangements
Section 16	Entry into Force/Expiry

Section 1 Scope and Basics

(1) These doctoral regulations apply to the conferral of the academic titles Dr.-Ing. (Doctor of Engineering Sciences) and Dr. rer. nat. (Doctor of Natural Science) at Faculty III – Process Sciences at Technische Universität Berlin.

(2) The faculty may present proposals to the Academic Senate for awarding one of the doctoral degrees in subsection 1 *honoris causa* (h.c.) in recognition of outstanding academic achievement.

(3) The term senior member(s) of academic staff¹ within this document is used to mean professors, junior professors, university lecturers, and *Privatdozenten* (adjunct lecturers).

(4) The doctoral degrees cited in subsection 1 may be awarded only once per academic chair.

Section 2 Objective and Content of the Doctorate

(1) ¹The doctoral process establishes that the doctoral candidate has the capacity to make an independent

¹) Approved by the Executive Board of Technische Universität Berlin on 28 October 2020.

¹ *Hochschullehrer*innen* is translated as "senior member(s) of academic staff" to avoid possible confusion with "University professor."

contribution to scientific research and development. ²This is demonstrated through the acceptance of a written dissertation and a successful scientific defense.

(2) ¹The dissertation is a scientific treatise written by the doctoral candidate that advances the scientific state of the art in a research area. ²The focus of the dissertation depends on the doctoral degree: for Dr.-Ing., the focus is on an engineering science, for Dr. rer. nat., it is on a mathematical or natural science. ³As a rule, the dissertation is written in German or English. ⁴With the approval of the faculty board, it may also be written in another language. ⁵An abstract of the dissertation must be provided in both German and English, irrespective of which language the dissertation is written in. ⁶The subject area must be represented by a full-time² senior member of academic staff within the faculty. ⁷A prior partial or complete publication of the dissertation is permitted.

(3) ¹The dissertation as a scientific treatise can consist of separate published papers or papers submitted for publication (*kumulative Dissertation* or dissertation by publication). ²Such work must follow an internal logic which has to be coherently demonstrated by an overall introduction and concluding discussion. ³Further details regarding the type and number of contributions are determined by the faculty.

(4) ¹Prepublication of scientific findings which constitute part of the dissertation or a cumulative dissertation is also possible on the basis of co-authorship. ²In cases of co-authored work, the applicant has to demonstrate which substantial contribution to the concept, content or methodology of the work they have made.

(5) In the scientific defense, the doctoral candidate should present the methodological approach and the scientific conclusions of the dissertation and thereby demonstrate their ability to assess the problems and findings of the dissertation and understand their significance within the relevant discipline.

Section 3 Admission Requirements

(1) ¹In order to be admitted as doctoral candidate, an applicant must have successfully completed a master's degree at a university or university of applied sciences (*Fachhochschule*) or a comparable degree (*Diplom*, *Magister*, or *Staatsexamen*). Generally, the aforementioned university degrees must have been successfully completed in an engineering field for a Dr.-Ing. and in mathematics or a natural science for a Dr. rer. nat. ²If a university degree was acquired in a subject area which does not correspond to the doctoral degree, the faculty board may require additional coursework and examinations.

(2) ¹Academically outstanding candidates with a bachelor's degree can be directly admitted to a doctoral degree on the basis of a qualification procedure. They are not required to obtain a further degree as defined in subsection 1 above. ²Academic aptitude is determined by

1. the successful completion of at least one and up to three admission exams in the subject area of the proposed doctoral research and related fields and one published work, generally as lead author, in a relevant publication with academic quality assurance, or
2. the successful completion of the entry phase of a graduate school or a comparable program. The entry phase must have a minimum duration of two semesters, be recognized by the faculty and be completed by at least one exam.

³At least one of the admission exams referred to in sentence 2, no. 1 may not be conducted by a supervisor.

⁴The admission exam verifies that the applicant has the required scientific and methodical abilities in the intended field of doctoral studies. ⁵The attendance of courses prior to the exam is not required. ⁶The faculty board may determine specific rules concerning the prepublication as well as the content, form and conducting of the admission exam. ⁷A failed admission exam cannot be repeated at the same or another faculty of Technische Universität Berlin.

(3) ¹An applicant completing a *Diplom* degree at a university of applied sciences, (*Fachhochschule*) with an overall grade of "with distinction", "very good", or "good", is required to further demonstrate their academic aptitude to pursue a doctorate. ²Such proof is provided by the applicant passing at least one and up to three admission exams in the subject area of their intended doctorate and related fields as per subsection 2. Admission exams are to be taken after the candidate has applied for admission as doctoral candidate in accordance with Section 4. The admission examination verifies that the applicant has the required academic skills in the field of their intended doctorate.

(4) ¹If the applicant has completed their university studies abroad, the faculty board may accept the equivalence of their university degree with a German university degree as per subsection 1 under consideration of an expert evaluation to be obtained from the relevant department at Technische Universität Berlin. ²In the event that the faculty board does not accept equivalence, additional studies and examinations may be required or the application declined.

(5) The additional required qualifications referred to in subsections 1 to 4 must be submitted prior to the application to commence the doctoral procedure.

(6) The faculty board must decline admission as doctoral candidate if the applicant's thesis or similar work has already been failed in the context of a doctoral procedure at a research university.

² "hauptamtlich"

Section 4 Application as Doctoral Candidate

(1) ¹The applicant must declare in writing their intent to pursue a doctorate at the faculty at the earliest possible date. ²The application must contain a description of the intended subject of the dissertation, a work plan, as well as the documentation referred to in Section 5 (1), sentence 3, nos. 1-3; candidates that have completed a *Diplom* degree at a university of applied sciences (*Fachhochschule*) must attach their *Diplom* thesis, as well as any possible additional scientific theses. ³The thesis should be supervised by a full-time senior member of academic staff or a junior research group leader holding a doctorate at the faculty. Proof of their agreement to act as supervisor must be provided. ⁴If a thesis is not to be supervised by a full-time senior member of academic staff within the faculty, the agreement of a full-time senior member of academic staff within the faculty to act as a reviewer pursuant to Section 6 (4) sentence 1 must be submitted along with the application. ⁵Furthermore, the candidate and their supervisor or supervisors shall conclude a supervision agreement in accordance with the relevant provisions of Technische Universität Berlin. ⁶The aforementioned provisions are passed by the committee which oversees the doctoral regulations of Technische Universität Berlin. ⁷The dean assesses the application and informs the applicant of either acceptance and possible conditions, or a rejection in writing in accordance with subsection 3.

(2) ¹In the case of acceptance, the applicant is entitled to reasonable support for completing their thesis from the faculty, within the scope of the available materials and personnel. ²There is no entitlement to a workplace at the University. ³Once the supervisor has declared their consent, they are obliged to supervise the applicant unless they can provide important reasons for terminating their supervisory role to the faculty board.

(3) ¹The faculty board may reject the application only if:

1. The field or research topic of the intended dissertation is not represented by a full-time senior member of academic staff within the faculty;
2. The thesis seems not to be practicable within the scope of the materials and personnel available or due to the subject;
3. The requirements stated in Section 3 are not met.

²This rejection must be substantiated in writing to the applicant. Section 11 (4) sentence 1 applies accordingly.

(4) ¹By registering their intent to pursue a doctorate, the doctoral applicant becomes a doctoral candidate. ²Unless employed by Technische Universität Berlin, the doctoral candidate is required to register as a student at Technische Universität Berlin in accordance with Section 25 (2) Berlin Higher Education Act (*Berliner Hochschulgesetz - BerlHG*).

Section 5 Admission to the Doctoral Procedure

(1) ¹The application for admission to the doctoral procedure must be directed in writing to the faculty. ²Application is also permissible if the intention to become a doctoral candidate has not been registered in accordance with Section 4 (1), or if the faculty board has rejected the application. ³The application for admission to the doctoral procedure must include:

1. A declaration that the applicant is conversant with the current doctoral regulations at Technische Universität Berlin;
2. Documentation as specified in Section 3;
3. A curriculum vitae;
4. Four printed copies of the dissertation and an electronic version as a PDF file. If the thesis is to be assessed by more than two reviewers, the appropriate number of copies must be provided.
5. Details as to what extent the dissertation or parts of it have already been published, plus a list of these publications and a copy of each, if applicable. In the case of co-authored publications, a list of the names of the co-authors and proof of the applicant's own contribution as per Section 2 (4);
6. A statutory declaration to the effect that the dissertation has been written independently, that aids and sources have been cited and, in cases of co-authored works, that the demonstration of the applicant's own contribution is correct in accordance with point 5;
7. A declaration as to whether earlier or concurrently an intent to pursue a doctorate in accordance with Section 4 has been submitted or a doctoral procedure applied for at another university or faculty. If applicable, complete details should be provided concerning the outcome (see also Section 7 (4), sentence 3).

(2) The doctoral applicant may propose the reviewer of the dissertation, whose selection must be justified in writing and submitted together with the application to the doctoral procedure.

(3) The application to the doctoral procedure and all submitted documents will remain with the faculty for up to ten years; thereafter they will be stored in the University Archive.

Section 6 Commencement of the Doctoral Procedure

(1) ¹The dean of the faculty will examine the application for the doctoral procedure and determine whether all required conditions are met. ²If so, the application to the doctoral procedure will be presented immediately to the

faculty board for consultation and decision. ³In the case of rejection by the faculty board, the procedure laid out in Section 11 (4) is to be followed.

(2) The members of the faculty board as well as other senior members of academic staff within the faculty are entitled to inspect the submitted documents.

(3) ¹If the faculty board approves the application for admission to the doctoral procedure, it will appoint a doctoral committee. ²This committee consists of a chair and at least two reviewers, one of whom should not be a member of Technische Universität Berlin. ³Up to two reviewers may also be co-authors. ⁴The committee must include at least one reviewer who is not also a co-author.

(4) ¹The chairperson and at least one reviewer of the doctoral committee must be full-time senior members of academic staff within the faculty. ²The chair of the doctoral committee may also be a junior research group leader with a doctorate. ³The faculty determines the relevant specific rules. ⁴A professor appointed as supervisor in accordance with Section 4 (1) will also continue to fulfill the requirements stated in sentence 1 after retirement, as an emeritus professor, or if they change to another university. In such cases, they will continue to be one of the reviewers who is a member of TU Berlin. ⁵Professors with leave of absence or retired professors, adjunct lecturers (*Privatdozenten*), extraordinary professors, honorary professors or junior research group leaders with a doctorate at the same or another faculty at Technische Universität Berlin or another university or a comparable academic institution outside Germany may also be appointed as reviewers. ⁶In justified cases, a reviewer may also be chosen from the circle of other academics holding a doctoral degree.

(5) The dean of the faculty will inform the doctoral candidate of the opening of the doctoral procedure and composition of the doctoral committee.

(6) ¹The dean will immediately inform the applicant if the faculty board rejects their application for admission to the doctoral procedure.

²This rejection is to be substantiated in writing by the faculty board and include instructions concerning the right to appeal. ³The dean will also inform the Executive Board of Technische Universität Berlin.

Section 7 Evaluation of the Dissertation

(1) The reviewers will individually and independently assess whether the submitted dissertation fulfills the requirements of a doctorate – in the case of pre-publications, under consideration of the details stated in Section 2 (4) sentence 2. They will produce written assessments with one of the following classifications:

sehr gut (very good)

gut (good)

befriedigend (satisfactory)

ausreichend (sufficient) or

nicht ausreichend (insufficient).

(2) ¹Assessments should be presented to the dean of the faculty not later than three months after the opening of the doctoral procedure. ²Copies of assessments will be submitted to the chair of the doctoral committee by the dean.

³Any delays must be justified to the chair of the doctoral committee.

(3) Should the majority of reviewers assess the dissertation positively; the chair of the doctoral committee will propose the continuation of the doctoral procedure to the dean.

(4) ¹Should the majority of reviewers assess the dissertation negatively, the dissertation is rejected and the doctoral procedure discontinued. ²The dean of the faculty will issue the doctoral applicant a written notification informing them of the suspension of the doctoral procedure (as per Section 11 (4) sentence 1). ³The dean informs the faculty board in its next meeting of the decision to suspend the doctoral procedure. ⁴A rejected dissertation may not be presented as a doctoral thesis at another faculty of Technische Universität Berlin.

(5) ¹Should exactly half of the reviewers evaluate the dissertation negatively, the faculty board, in consultation with the doctoral committee and the doctoral candidate, will nominate an additional reviewer who should be professor at another university.

²The continuation or discontinuation of the doctoral procedure will then be decided on majority basis.

Section 8 Scientific Defense

(1) ¹If the doctoral procedure is continued, the dean will arrange with the doctoral committee and the doctoral candidate a date for the scientific defense. ²The dean will invite the following persons to attend (invitations to be issued at least 14 days prior to the scheduled date):

a) Members of the doctoral committee, additional reviewers and the doctoral candidate;

- b) Members of the faculty board, other university professors, extraordinary professors or honorary professors as well as teaching and research associates with doctorates who are members of the faculty, and the members of the Executive Board;
- c) Upon receipt of a justified proposal by the doctoral candidate or members of the faculty board: additional scientists who do not have to be members of Technische Universität Berlin.

³The dissertation is displayed in the faculty administration for review by the persons referred to in sentence 2 for a period of at least 14 days prior to the scientific defense. ⁴Members of the doctoral committee, full-time senior members of academic staff, and members of the faculty board will have access to the evaluations in accordance with Section 7. ⁵If access to the documents in the faculty administration is not possible by the time of the scientific defense due to circumstances beyond control, the dissertation and evaluations can be made available digitally in a web-based cloud in accordance with data protection provisions. ⁶The dean may grant access to the evaluations to the persons cited under sentence 2, letter c).

(2) ¹The scientific defense is open to the University public; the chair of the examination committee may, upon application admit non-members of Technische Universität to the scientific defense. ²The scientific defense is usually held in German or English; the chair of the doctoral committee may permit exceptions provided that all members of the doctoral committee are in agreement. ³The presence of the chair of the doctoral committee and at least one of the reviewers from TU Berlin as well as at least one external reviewer is required throughout the entire defense. ⁴A simultaneous defense with more than one doctoral candidates is not permitted.

(2a) ¹If the candidate or a member of the doctoral committee is unable to attend the scientific defense in person as a consequence of circumstances beyond their control, the chair of the committee may, with the agreement of the dean, agree to their participation via sound and image transmission. ²This then counts as the person being present. ³Should the entire doctoral committee be unable to attend the scientific defense in person due to circumstances beyond their control, the chair of the committee may, with the agreement of the candidate and other members of the committee as well as the dean, agree to the scientific defense being conducted by image and sound transmission in the form of an online conference. ⁴Participants may only take part in the defense via image and sound transmission if the requisite technical requirements are provided and if the principle of oral examination, the presence of the University public and the principle of collegiality regarding the discussion and awarding of grades by the doctoral committee can be guaranteed.

(3) ¹The scientific defense consists of a talk on the dissertation lasting normally 30 minutes given by the doctoral candidate and a subsequent discussion with the reviewers regarding the subject area of the dissertation. ²Thereafter, with the consent of the chair of the doctoral committee, the audience may direct questions to the doctoral candidate on the subject of the dissertation. ³This discussion normally lasts one hour. ⁴The scientific defense lasts at least 90 minutes, but should not exceed 120 minutes.

(4) ¹Immediately after the scientific defense, the doctoral committee will decide in a non-public meeting whether the doctoral candidate has passed the scientific defense with the classification:

- sehr gut (very good)
- gut (good)
- befriedigend (satisfactory) or
- ausreichend (sufficient)

or if the candidate has failed the defense. ²Additionally, the doctoral committee aggregates the decisions of the reviewers into a joint decision of:

- sehr gut (very good)
- gut (good)
- befriedigend (satisfactory) or
- ausreichend (sufficient)

³If the candidate passes the scientific defense, the doctoral committee will decide if the entire doctorate has been passed with the grade

- with distinction (or summa cum laude),
- very good (or magna cum laude),
- good (or cum laude)
- or passed (or rite)

⁴The overall decision "passed with distinction" may only be awarded if all reviewers assessed the dissertation as "very good", without qualification, and the scientific defense has been assessed as "very good" without qualification by all members of the doctoral committee.

(5) ¹A written record should be prepared regarding the scientific defense, containing (at least) the following information:

- Place, date and duration of the scientific defense;
- Name of the doctoral candidate;
- Title of dissertation;
- Members of the doctoral committee;

- Assessment of the dissertation;
- Assessment of the scientific defense;
- Overall assessment
- Remarks concerning the publication;
- Attendance list.

²This record is to be signed by the members of the doctoral committee present.

(6) ¹The chair of the doctoral committee immediately informs the doctoral candidate of the result and issues a preliminary certificate. ²Minor or stylistic modifications to the dissertation may be agreed between the doctoral candidate and the doctoral committee. ³The dean will be informed of the overall result of the doctorate and will advise the faculty board thereof.

(7) ¹If the candidate does not pass the scientific defense as per subsection 4, they may within one month of being informed thereof request a repeat of the defense. ²The repeat of the scientific defense takes place within 12 months of the publication of the assessment. ³The above subsections apply accordingly. ⁴The doctoral procedure will be discontinued if the doctoral candidate does not request a repeat of the scientific defense or if they do not pass the repeated scientific defense. ⁵The doctoral candidate is to be informed of the discontinuation of the doctoral procedure as per Section 11 (4).

§ 8a Remonstrance

(1) The doctoral candidate has the right to submit a remonstrance to the doctoral committee against the result of the doctoral procedure or individual parts thereof.

(2) ¹The remonstrance is to be directed in writing to the chair of the doctoral committee with written justification within three months of the publication of the results. ²The candidate shall be granted access to the files relating to their assessed work to substantiate their reasons

(3) ¹The chair of the doctoral committee is responsible for ensuring the remonstrance procedure is conducted properly. ²The chair presents the remonstrance to the members of the doctoral committee; ³The doctoral committee makes a decision within one month of the remonstrance being submitted. ⁴During this process, the relevant evaluations and their argumentations are to be reviewed

(4) ¹The outcome of this review including the grade is to be justified in writing. ²The chair of the doctoral committee informs the candidate and dean of the doctoral committee's decision regarding the remonstrance.

Section 9 Publication of the Dissertation

(1) ¹Before the doctorate can be awarded to the candidate upon passing the scientific defense, the dissertation must be made accessible to the scientific public in an appropriate manner within twelve months following the scientific defense. ²This period may be extended in duly justified cases and on application to the faculty.

(2) ¹A dissertation is deemed to have been made accessible to the scientific public in an appropriate manner if the author provides the University Library free of charge a copy of the thesis in the version approved by the doctoral committee for the purpose of dissemination. ²The University Library determines if the copy provided fulfills the relevant requirements. ³The doctorate can be submitted in the following formats:

1. One bound and durable copy and an identical electronic version, whose data format and data carrier must conform to the requirements of the University Library, or
2. Fifteen bound and durable copies in letterpress, or
3. In the case of monographs and as long as a commercial publisher agrees to distribute and commits by contract to make the work available on the market for four years, three copies indicated as a dissertation on the copyright page and stating Technische Universität Berlin as the place of dissertation.

(3) ¹The copies provided to the University Library must include a dissertation title page according to the requirements of the University. ²A sample of the title page is available at the University Library.

(4) Furthermore, the candidate has to transfer the abstract electronically as per Section 2 (2), sentence 5 to the University Library for the purpose of its dissemination via bibliographic databases.

Section 10 Awarding the Doctorate

(1) The dean completes the doctorate procedure by presenting the doctoral certificate as soon as the doctoral candidate has fulfilled the criteria specified in Section 9.

(2) The bilingual certificate (German/English) states the subject, the overall assessment of the doctoral procedure, the date of the scientific defense, and bears the dated signatures of the president and the dean, as well as the seal of Technische Universität Berlin.

(3) The awarding of the doctoral certificate entitles the doctoral candidate to use the respectively awarded title.

(4) The faculty administration maintains a file of submitted doctoral applications and awarded doctorates.

Section 11 Withdrawal of the Doctoral Application, Suspension of the Doctoral Procedure

(1) ¹The candidate's application for withdrawal of the doctoral application must be directed in writing to the faculty. ²The dean reviews whether a written evaluation of the doctoral work was already submitted. ³The faculty can only consider a doctoral candidate's request to withdraw the doctoral application if no written evaluation has been submitted. ⁴If no written evaluation has been submitted, the application to withdraw from the doctoral procedure will be presented immediately to the faculty board for consultation and decision.

(2) ¹Should the doctoral candidate fail or refuse to comply with a request from the dean with respect to the doctoral procedure without providing acceptable reason to the faculty board, or if the doctoral candidate fails to submit the revised version of a dissertation in the prescribed format without providing good reason within a period of twelve months after a positively assessed scientific defense, the doctoral procedure will be discontinued by decision of the faculty board. ²The same also applies if, after a written evaluation from a reviewer has been submitted, the doctoral candidate states that they do not wish to continue the doctoral procedure.

(3) ¹If it is determined prior to awarding the doctoral certificate that the doctoral candidate has deliberately made scientific misrepresentations, the faculty board will decide, upon providing the doctoral candidate opportunity to comment on these accusations, whether the doctoral procedure should be continued. ²If there are doubts concerning the validity of the accusations, the procedure will be suspended until clarification.

(4) ¹The dean must issue, substantiate and provide the notifications including an instruction concerning the right to an appeal in writing. ²The Executive Board is to be notified.

Section 12 Joint Doctoral Procedure with Foreign Educational Institutions

(1) In order to foster international cooperation, the faculty may conduct a joint doctoral procedure with foreign universities or comparable educational institutions.

(2) ¹The framework for the joint doctoral procedure shall be established on an individual basis in a contractual agreement stipulating that the provisions of these doctoral regulations apply to the joint doctoral procedure. ²Any deviation from these doctoral regulations may be incorporated within the contractual provision in accordance with the following provisions.

(3) It must be ensured that the acquired degree can be held in the country where the foreign university or comparable educational institution with which the agreement is to be concluded is located.

(4) ¹The submission of a dissertation and a scientific defense is required for the joint doctorate. ²In the event that the dissertation and/or the scientific defense are completed in the national language of the foreign university/comparable educational institution, or a language other than German, a written abstract or summary must be provided in German. ³A significant part of the work on the dissertation must be completed at Technische Universität Berlin.

(5) Apart from the chair of the doctoral committee, each university or comparable educational institution should employ the same number of reviewers to assess the joint doctorate.

(6) The doctoral documents are retained by the university or comparable educational institution where the oral defense takes place; the other university or comparable educational institution will also receive a copy.

(7) A bilingual doctoral certificate referring to the joint doctoral procedure and stating the doctoral degree to be held in the respective country will be issued by the university or comparable educational institution where the scientific defense took place, and signed and sealed by both universities or comparable educational institutions.

Section 13 Honorary Doctorates

(1) ¹At the request of the faculty, Technische Universität Berlin may, by decision of the Academic Senate, confer the following academic titles in recognition of outstanding academic merit pertaining to one of its areas: Dr.-Ing. E. h. (Honorary Doctor of Engineering Sciences), or Dr. rer. nat. h. c. (Honorary Doctor of Natural Sciences). ²The person being awarded the degree may not be a member of Technische Universität Berlin.

(2) ¹The resolutions of the faculty board require two readings. ²Both ballots are secret.

(3) ¹The Academic Senate must also decide on the awarding of an honorary doctorate. ²Details regarding this are governed by the regulations of the Academic Senate.

(4) An additional conferral of an academic honorary degree according to subsection 1 is only possible if a previous conferral was made by another university and for other reasons.

(5) The honorary doctorate is awarded by presenting the certificate, which is signed by the president and the dean, bears the seal of Technische Universität Berlin and states the merits of the doctorate holder.

(6) All German-speaking universities will be notified of the conferral of the degree by the Executive Board of Technische Universität Berlin.

Section 14 Revocation of a Doctoral Degree

- (1) The revocation of an academic title occurs pursuant to Section 1 in accordance with the statutory provisions.
- (2) The Executive Board of Technische Universität Berlin notifies all German-speaking universities and the member of the Senate of Berlin with responsibility for universities of the revocation.
- (3) The aforementioned provisions apply correspondingly to the revocation of honorary doctorates.

Section 15 Transitional Arrangements

¹Doctoral procedures that were commenced prior to the enactment of these regulations will be concluded in accordance with the regulations that have applied thus far. ²Applicants who had already applied for acceptance as doctoral candidates at the time of the enactment of these regulations may, within a period of two years after this enactment, conclude their doctorate in accordance with the regulations which were in effect at the time of their application. ³The choice should be made irrevocably with the application when commencing the doctoral procedure.

Section 16 Entry into Force/Expiry

- (1) These Regulations shall enter into force on the day after their publication in the Official Gazette of Technische Universität Berlin.
- (2) Except in the sphere of Section 15, the doctoral regulations for Technische Universität Berlin of 23 October 2006 (AMBI. TU no. 6/2008 of 15 April 2008), last amended on 13 January 2010 (AMBI. TU no. 3/2011 of 14 February 2011) and of 15 January 2014 (AMBI. TU no. 2/2014 of 4 February 2014) for doctoral procedures at Faculty III - Process Sciences expire.
